

AIME CESAIRE

mug.cesaire@gmail.com | [GitHub](#) | [Website](#) | [LinkedIn](#) | [Substack](#) | Philadelphia, PA · Open to Relocation

SUMMARY

Shipping **AI implementations** and **full-stack systems**. Proven experience in integrating cloud, data, and GenAI to drive revenue and efficiency. Built scalable systems, real-time integrations, and reliable automations reclaiming \$200K+/yr in losses and unlocking \$100K+/yr in revenue.

TECHNICAL SKILLS

AI & Data: LangChain, PyTorch, Hugging Face Transformers, Open AI API, RAG, Pandas, SQL, Postgres, MongoDB

Full stack: Python, TypeScript, Node.js, React, Rust, C++, React Native, Flask, REST, GraphQL, Git, GitHub Actions

Cloud & Systems: AWS, Azure, Power Automate, Docker, Linux, IAM & RBAC, DHCP & DNS, Postman

PROFESSIONAL EXPERIENCE

Systems & AI Engineer | Gratz Pilates

Apr 2026 - Present

- Optimized AI agents within Microsoft 365, Shopify, and HubSpot ecosystems using context engineering and RAG; grounded model responses in internal data and manufacturing specifications, achieving **<0.01% hallucination rate**.
- Built an AI-powered reconciliation tool to audit Fishbowl vs. Shopify data, utilizing deterministic logic and local Kimi model to investigate potential SKU or description discrepancies; **reduced fulfillment errors by 95% (\$150K+/yr)** by surfacing configuration, price, and quantity mismatches before shipping.

Systems Engineer | Gratz Pilates

Jun 2025 - Apr 2026

- Developed a full-stack **Shopify-HubSpot integration**: gathered requirements, designed the system, and led external developers to ship v1. Independently shipped later features to make the integration real time and resilient.
- Optimize a hybrid cloud environment spanning AWS, Azure, Digital Ocean, on-premises Linux (Apache), and Windows servers. Wrote Python and PowerShell scripts to **automate backend service monitoring** and critical data backups.
- Architected a comprehensive security framework across PaaS, and SaaS environments; implemented enterprise-grade **IAM and RBAC protocols**; **deployed OAuth 2.0** in company custom integration solutions.
- Resolved a critical HubSpot integration bug in Fishbowl Inventory by **reverse-engineering JAR files** and performing root-cause analysis; authored a technical proposal successfully adopted by the Fishbowl development team.

IT Support Engineer | Amherst College

Sep 2022 - May 2025

- Performed 20+ root-cause investigations into major software outages, utilizing Postman, Chrome dev tools, and other diagnostic tools to **debug SaaS APIs** and minimize service disruptions for critical enterprise systems.
- Automated ticket triage** and resolution workflows for 3K+ technical escalations, reducing average response time by 50% while collaborating with senior engineering teams to debug and resolve complex system-level issues.

Program Assistant | AI in the Liberal Arts at Amherst College

Sep 2022 - May 2023

- Researched and **prototyped AI architectures**, including LLMs, diffusion models, GANs, and multi-modal neural networks, for presentations, blogs, and to inform the general strategic evolution of the program.

TECHNICAL PROJECTS

Enterprise Integration Middleware | Node.js, Java, REST APIs, PostgreSQL

- Bidirectional sync service between HubSpot CRM and Fishbowl Inventory, automating SKU mapping, polling, and auth; eliminated manual order entry for the sales team, ensuring **100% data fidelity** and **reclaiming \$120K+/yr**.

Automated Factory Floor Labeling Ecosystem | TypeScript, Electron, ODBC, SQL

- Cross-platform Electron app to automate labeling, **reclaiming \$80K+/yr** in losses from shipping errors. Leveraged ODBC to interface directly with remote databases and caching to ensure sub-second label generation.

Full-Stack Shopify Application Suite | Preact, GraphQL, SQLite, Shopify API

- Custom applications to automate international tax compliance and optimize checkout logic; achieved a 2x increase in transaction speed and **unlocked \$100K+/yr** in revenue through reduced cart abandonment

EDUCATION

B.A. with Distinction in Computer Science & Math, GPA: 3.95 | Amherst College

Aug 2021 - May 2025

- Coursework: NLP, AI, ML, Optimization, Data Mining, Security, Systems, Networks, Data Structures, Algorithms
- Activities: Association for Computing Machinery, AI in the Liberal Arts

Study Abroad Semester, GPA: 3.67 | Sorbonne Sciences & Nanterre Université

Jan 2024 - May 2024

- Relevant Coursework: Cryptography

CERTIFICATES

Deep Learning Specialization | DeepLearning.AI

- Convolutional neural networks, recurrent neural networks, and transformers.

Google Cybersecurity Professional Certificate | Google

- OWASP Top 10, SIEM with Splunk, intrusion detection, and incident response

Microsoft Azure Fundamentals | Microsoft

- Provisioning, monitoring, and scaling, containers, cloud functions

DevOps on AWS Specialization | Amazon Web Services

- CloudFormation, Terraform, Kubernetes, DynamoDB
